EISCAT Scientific Association - Environmental Policy

Kiruna, 13 November 2023

EISCAT Scientific Association is committed to minimising the impact of its activities on the environment, and is committed to reducing them.

The key points of its strategy to achieve this are:

- Continually improve our environmental performance by monitoring and reviewing progress on a regular basis
- Minimise waste by evaluating operations and ensuring they are as efficient as possible.
- Minimise toxic emissions through the selection and use of its instruments and assets and the source of its power requirement.
- Actively promote recycling both internally and amongst its users and service providers.
- Source and promote a product range to minimise the environmental impact of both production and distribution.
- Meet or exceed all the environmental legislation that relates to the Association in each of its host countries.
- Use if possible an accredited program to offset the greenhouse gas emissions generated by our activities.

A handwritten signature in black ink, appearing to read 'Bengt Hultqvist', written over a light blue horizontal line.
